

Success Story: Proline Motors

“AUTOSavvy is a user-friendly, comprehensive system that is great for the good management of your business.”

Adriaan Nel
Proline Motors Owner

Proline Motors is a premier motor dealership based on the East Rand committed to providing superior pre-owned vehicles. Proline prides themselves on fostering long term relationships with their customers by giving them access to the quality of service that they have come to rely on.

Prior to the AUTOSavvy system, Proline didn't have access to an integrated system. “We had to load each and every customer separately, there was no control between stock and invoicing, and the admin process of aligning these two processes could take up to half a day to complete” explains Proline Motors owner, Adriaan Nel.

So, when Adriaan was introduced to the AUTOSavvy system, he was only too willing to try out some of the great capabilities and functions that the system would allow them to implement. Immediately, Adriaan was impressed by the automation between processes that AUTOSavvy provides as well as its end-to-end stock management functionality, “The system allows you to effectively manage stock from birth to death.”

“AUTOSavvy is a user-friendly, comprehensive system that is great for the good management of your business” states Adriaan.

Adriaan believes that the key advantages of the AUTOSavvy Car Dealership System is its ease of use and long-term benefits. “At the moment, we only have the basics in place, but what's great about the AUTOSavvy system is that going forward, once we expand, we'll have access to additional functionality. The AUTOSavvy system accommodates for what your business needs.”

“I know a lot of systems, and out of those systems, AUTOSavvy has the edge as an end-to-end system that gives you more management control.”
